

About Display Fixtures

YIJIAO can develop and manufacture display & fixtures using a variety of materials such as acrylic, metal and glass with built in lighting. Our experienced team of engineers and fabricators can give you solution to bring your concepts to reality. We have professional team with rich experience in lighting and display to meet the customers' needs. We work with high-end luxury brands to provide the merchandising tools and props to show their products to their consumers.

Services

PROTOTYPING

You'll receive prototypes to review your packaging and display before production. We can provide prototypes within 48 hours of receiving artwork/dielines.

DESIGN & INNOVATION

Our design team offer a full suite of design services and it's in our DNA to continually innovate in the way things

SHIPPING & LOGISTICS

We manage the delivery of all your packaging and post display items directly to your store.

QUALITY CONTROL

You'll receive prototypes to review your packaging and display before production. We can provide prototypes within 48 hours of receiving artwork/dielines.

PRODUCTION

We manage the production with our factories, organising critical time paths and communicating updates daily.

BENIFIT

By managing the risks, Retail Reactive can not only source and negotiate best price, but offer an innovative and creative solution whilst enabling you to benefit commercially from low cost manufacturing from China.

The Evolution Of An Idea – Concept To Creation

1. Concept Sketching

Concept drawings or sketches are often freehand and used as a quick and simple way of exploring initial ideas for designs. They are merely a way of investigating and communicating design principles and aesthetic concepts.

2. 3D Renders

3D renders allow clients to see what their products would look like in a photo realistic way. The visualisation capabilities enable you to quickly and easily create powerful images and animations to clearly communicate your design intent.

3. Prototype

A prototype is an early sample, model or release of a product built to test a concept or process. A prototype is generally produced to evaluate our new designs or test a new material or structure. By producing a prototype, you are able to see a live example before mass production or roll-out.

4. Completion

Once sketches, renders and prototypes are signed off, the end result is completion. Whether it is a national rollout, logistics or installation, OPG has the solution for retail delivered beautifully.
