Tactile (raised characters in San Serif)

Compliant Grade 2 (contracted) braille

All uppercase fonts that are required by law to be between 5/8" and 2" high

Appropriate pictograms that show the accessibility of their corresponding room

High-contrast color combinations with a matte finish for optimal visibility

Templated and customizable designs

### ADA Signs: Official ADA Signage Requirements

According to the Americans with Disabilities Act, every building that offers access to the public must have appropriate signage posted to mark specific locations, such as restrooms and exits. AtCustomSigns.com, we create ADA-compliant plastic signs with braille that meet current United States regulatory standards. Shop this section for pre-designed and custom ADA restroom signs, exit signs, room name signage, and stairwell signs.

### Accessibility for Everyone

Creating an ADA-compliant building ensures all customers have a safe and pleasant experience while also protecting your business from liability. When a building is missing necessary accessibility and Braille signs, there is a higher potential for fines to be levied; however, the government works with businesses to become compliant, even offering tax incentives to help meet the cost of compliance. For more information about where to hang ADA signs, we have a helpful blog that provides height requirements and which rooms these signs should be posted for.

Whether you require signs for your office, restaurant, warehouse, school or hospital, we have you covered. If you cannot find what you need, we can manufacture custom made signs to suit your requirements.

Our in-stock Braille signage is designed to be multifunctional and adaptable to any setting. Featuring a range of accessible colors and a minimalist design, these signs seamlessly complement various occasions and can even serve as stylish decor.

#### Exit & Entrance

- 152mm\*202mm
- \$6.1-\$8.5

#### Restroom

- 152mm\*202mm
- \$6.1-\$8.5

#### Janitor

- 152mm\*202mm
- \$6.1-\$8.5

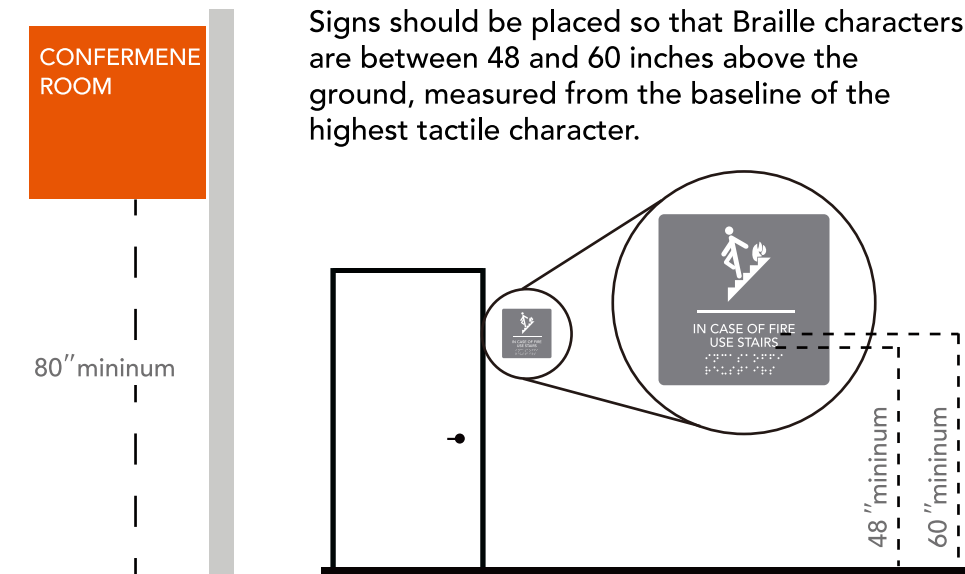

#### General Manager Room

- 152mm\*88mm
- \$6.1-\$8.5

## Placement

It's vital that ADA signs are well-placed for optimum visibility and accessibility.

Ceiling or wall projection signs should measure at least 80 inches from the bottom of sign to the floor.

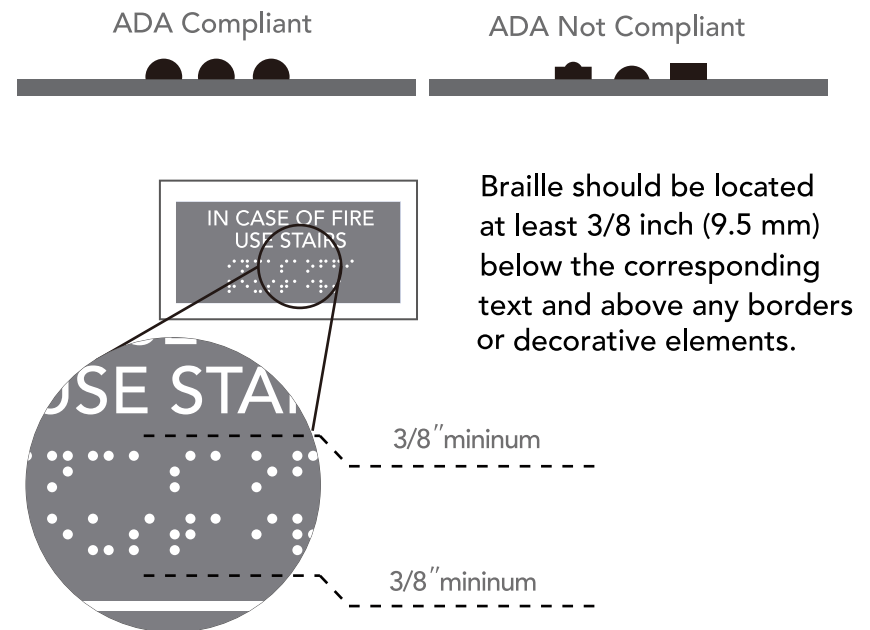

Signs should be placed so that Braille characters are between 48 and 60 inches above the ground, measured from the baseline of the highest tactile character.

## Braille

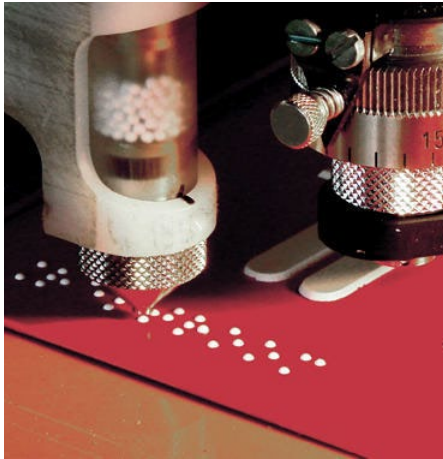

Braille is required for any signs that identify a room,

Braille dots should be dome-shaped, not flat

Braille should be located at least 3/8 inch (9.5 mm) below the corresponding text and above any borders or decorative elements.

Proper installation of our Braille signs is crucial for accessibility and compliance. Correct placement ensures that visually impaired individuals can easily find and read the signs, meeting legal requirements and enhancing the user experience. With our expertly crafted Braille signs, your space will provide a welcoming and accessible environment for everyone.

We make various custom ADA compliant signs. Raised Tex and raised braille to comply with ADA rules to create the Braille, we have different options. including the common methods of drilling and adding beads. A new option is UV LED printing, with software created by Direct Color System that makes it faster and easier.

Our printing process is the-top-of-line. We printing directly onto the sign surface, allowing us to avoid peeling, adhesion issues, fading and unnecessary waste. The ink is colorfast, scratch resistant and water proof!

High quality painting finish means on seams, durable fade resistance and sun & water resistant. We use high-quality Matthews paint System which provides 16 base colors with 80000+ customized color shades, including Pantone.

Every of our completed signs will get inspection one by one before packing to avoid any mistake of coloring, texting or quantify error. Each sign will protect by single bag and clean sign. client will receive a totally fresh and clean sign.

***Please send us your order quantity and address via email.***
